Abstract of DE3331016

Adhesive film for releasable adhesive bonds based on a) thermoplastic rubber and b) tackifying resins, the adhesive film having c) high elasticity and d) low plasticity and e) the adhesion being lower than the cohesion, f) the adhesion largely disappearing during the extension of the film, g) the ratio of stripping force to tearing load being 1 : 2 or more, and h) an adhesive bond produced therewith being releaseable by pulling at the adhesive film towards the plane of adhesion. o
